

ENVIRONMENTAL POLICY

RWNA Engineering Sdn Bhd (RWNA) as a responsible company is seriously committed to protecting our environment in conducting its business activities and is implementing and promoting its policies in preserving the environment and natural resources which includes:

- To prevent and minimize atmosphere water and land pollution;
- To prevent and minimize the harmful effect of human activities on the environment and biodiversity;
- To preserve natural resources;
- To avoid or reduce wastage of natural resources and energy;
- To optimize usage of resources and products in conducting the daily business;
- To raise awareness the importance of clean and safe environment will lead to healthy life;
- To protect the biodiversity and ecosystem.

RWNA management team has formulated and designed strategies to meet the policy objectives

- We will promote and raise environmental awareness and conservation of natural resources and to implement the "GO GREEN" policy among our staffs including recycling exercise;
- All employees are responsible to ensure that our operations are harmless to the environment;
- To train our staffs to implement smart usage of resources to prevent wastage;
- We will provide necessary environmental protection gears and pollution mitigation control in our business activities;
- We will comply to all applicable legal requirements and to adhere to National Policy on the Environment;
- All necessary training regarding environmental and sustainability will be provided to our staffs from time to time;
- We will monitor our environmental performance to ensure continuous improvement towards effective Environment Management System.

The successful implementation of this policy will improve not only our production but will enhance our reputation in managing environmental issues which will benefit our Company, staffs and most importantly our stakeholders and our beloved nation.
